May 9, 2014

Dear Professor Desgreniers,

Please find enclosed my work term report for my first CO-OP semester (PHY3906) which I partook in from January 6 to April 25, 2014. The work term followed my completion of the academic term 3A.

I spent my work term at Statistics Canada as a Researcher in the Modelling Division. My supervisor was Miroslav Kucera, a PhD who also works as a Researcher.

The title of my enclosed report is *Microsimulation, LifePaths, and Source Control at Statistics Canada*, and in it is a description of the work environment, an overview of the different projects the Modelling Division participates in, and a report of the work I accomplished during my work term.

The report is a product of my own work, and was graciously reviewed by my supervisors Miroslav Kucera and Jennifer Jones, who provided me with feedback and suggestions for improvement.

Yours sincerely,

Mohammed Afif Chamma  
Third-Year Honours BSc With  
Specialization in Physics-Mathematics
